

Cancer Physician Update

March 2023

Kidney cancer innovations and collaborations

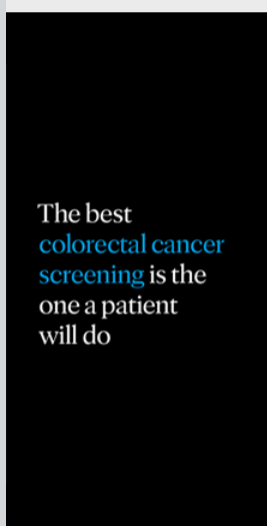

Patient Care

Mayo Clinic's CHIP clinic detects variants to intercept cancer early

Clonal hematopoiesis of indeterminate potential (CHIP) increases risk of blood cancers. Mayo Clinic experts screen for CHIP through a specialized clinic program to monitor risk and detect cancer earlier.

Colorectal cancer screening preferences are shifting

With the advent of less invasive colorectal cancer screening options, more care teams are tailoring screening to each patient's needs. The best screening is the one with which a patient will follow through.

Research

Brentuximab vedotin plus standard chemotherapy improves survival in Hodgkin lymphoma

Hematology researchers at Mayo Clinic have found that brentuximab vedotin plus standard chemotherapy improves overall survival with comparable side effects and toxicities for patients with Hodgkin lymphoma.
